From the Editor:

The original Index to *Tipularia* covered from the first issue, November 1986 to the 1997 edition. The second Index to *Tipularia* was published upon reaching the 20-year milestone and covered from November 1986 through 2006. With this electronic PDF version I will attempt to keep it up to date, this version covering from November 1986 through 2014.

According to David Emory, one of the founders of *Tipularia*, the founding editor Margaret Shannon had every intention of publishing the magazine semiannually or eventually as a quarterly publication. The first *Tipularia* was published in November of 1986, closely followed by two issues in 1987, one in 1988 (between editors), and two in 1989 and 1990. Pretty soon everyone realized what a monumental task it is to even get one issue published a year, especially when you consider that the work is done by volunteers. Therefore, from 1991 to present only one issue a year has been printed.

The following chart will show the issues of *Tipularia* in chronological order, the successive editors, and plants illustrated on the covers:

November 1986	Margaret Shannon	Crane-fly orchid
May 1987	Margaret Shannon	Hairy rattleweed
November 1987	Margaret Shannon	Fringed gentian
Fall 1988	Anna Belle Close	Yellowwood (2 spp.)
Spring 1989	Anna Belle Close	Green-fly orchid

2011	Richard & Teresa Ware	<i>Platanthera fissa</i> [<i>peramoena</i>] (Purple Fringeless Orchid)

2013	Richard & Teresa Ware	<i>Asclepias lanceolata</i> (Few-flower Milkweed)
2014	Richard & Teresa Ware	<i>Helonias bullata</i> (Swamp Pink)

And, to quote David, we are very grateful to all the editors who have preceded us for the high standards of publication they have established and maintained. Hopefully, Teresa and I and others will be able to follow their scenic path.
