Index to Tipularia:
November 1986 - 2018

This index has five categories:

Articles - articles about botanical subjects or places, alphabetized by title.................................3
Biographies - articles about Georgia botanists, alphabetized by name.............................................12
Book Reviews - articles reviewing botanical publications, alphabetized by book title........................13
Authors - list of contributors, alphabetized by author's last name....................................................15
Editions of Tipularia - a chronological listing of each edition, with articles listed as they appear by page number....................................................................................................................................27

From the Editor:

The original Index to Tipularia covered from the first issue, November 1986 to the 1997 edition. The second Index to Tipularia was published upon reaching the 20-year milestone and covered from November 1986 through 2006. With this electronic PDF version I will attempt to keep it up to date, this version covering from November 1986 through 2018.

According to David Emory, one of the founders of Tipularia, the founding editor Margaret Shannon had every intention of publishing the magazine semiannually or eventually as a quarterly publication. The first Tipularia was published in November of 1986, closely followed by two issues in 1987, one in 1988 (between editors), and two in 1989 and 1990. Pretty soon everyone realized what a monumental task it is to even get one issue published a year, especially when you consider that the work is done by volunteers. Therefore, from 1991 to present only one issue a year has been printed.

The following chart will show the issues of Tipularia in chronological order, the successive editors, and plants illustrated on the covers:

And, to quote David, we are very grateful to all the editors who have preceded us for the high standards of publication they have established and maintained. Hopefully, Teresa and I and others will be able to follow their scenic path.
